## **Iraq- Mobile Troposcatter Radio Systems**

WASHINGTON, August 5, 2013 – The Defense Security Cooperation Agency notified Congress today of a possible Foreign Military Sale to Iraq of Mobile Troposcatter Radio Systems and associated equipment, parts, training and logistical support for an estimated cost of \$339 million.

The Government of Iraq has requested a possible sale of 19 Mobile Troposcatter Radio Systems, 10 Mobile Microwave Radio Systems, spare and repair parts, support equipment, publications and technical data, personnel training and training equipment, site surveys, U.S. Government and contractor technical assistance, and other related elements of program and logistics support. The estimated cost is \$339 million.

This proposed sale will contribute to the foreign policy and national security of the United States by improving the Iraqi military's situational awareness and enhancing command and control from its National Military Headquarters to major subordinate commands.

The Government of Iraq intends to use these defense articles and services to provide critical redundancy for national level command and control.

This proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Raytheon Company of Arlington, Virginia. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require U.S. Government and contractor representatives to travel to Iraq on an as-needed basis to provide program and technical support and training.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law and does not mean the sale has been concluded.
